SmartSlides User Manual

WaveMedia

22/05/2015

Contents

1   Introduction

This document is purposed to help the user in the first instance of encountering difficulties using the WaveMedia SmartSlides product.

2   Home Screen

This is the screen onto which the program will open. There are 6 buttons on this screen that provide access to the most recently opened slide shows. On these buttons is displayed information about each slide show; they show the Author, Version, and comments about the presentation. At the top of this page is the Menu bar where further options can be accessed, such as open file and full program settings. Further detail about the Menu bar is shown below:

3   Settings Screen

On this page all settings for the program can be accessed, these are described below:

3.1   Auto-Next

4   Menu Bar

The Menu bar sits at the top of the Home and Settings windows. This is for quick access to various options within the program.

4.1   File

Here there are options to either open a new file, by clicking the 'Open File' option, or exit the program, the 'Exit' option.

4.2   Settings

In the Settings tab is access to quickly change some settings of the program. This tab provides access to the following settings (details of which can be found in the Settings Screen section, 3):

- Screen select

- Auto-next

- ...

As well as these the full settings screen can be accessed from here by clicking the 'More Settings' option.

4.3   Help

The help tab provides links to this and an FAQ document along with a quick link to the website.

5   Presenting

During a presentation

6   Website
